WARREN COUNTY, OH (FOX19)- John Kasich's administration paid a special visit to Warren County on Tuesday.

Members of the Ohio governor's administration hosted a special event called 'Beyond Boundaries: A Shared Services Action Plan for Ohio's Schools and Governments'.

The visit focused on Kasich's commitment to shared services to help local governments and school districts reduce costs, as well as increasing efficiency and improving value for area taxpayers.

Highlighted during the event was Warren County Telecommunications departments' collaboration with the state radio system.

Their collaboration comes during the transition to a digital system, which is set for next year.

The facilitation between the two entities will save taxpayers \$1 million.
